Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

- a) Species I, e.g. claims 1-17: A method comprising reducing a height of a plurality of roughness formation on a surface of a film on a semiconductor substrate by exposing the film to a smoothing medium;**
- b) Species II, e.g. claims 18-21: A method for constructing a memory cell comprising forming a polymeric body on a first electrode, the polymeric body having a plurality of roughness formation on a surface thereof, the roughness formations having a first height; forming a second electrode on the interface material to change a charge of the polymeric body from a first value to a second value when a voltage is applied across the first electrode and the second electrode, the interface material completely separating the polymeric body from the second electrode;**
- c) Species III, e.g. claims 22-27: A method of constructing a semiconductor device comprising forming a plurality of first conductive lines, extending in a first direction, on the dielectric layer; forming a plurality of a second conductive lines, extending in a second direction, on the interface sections to position each respective pair of polymeric and interface sections between one first and second conductive line, the second direction being transverse to the first direction, the interface section completely separating the polymeric sections from the second conductive lines.**

Art Unit: 2818

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claims is finally held to be allowable. Currently, no claims is generic.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is all claims are generic is considered non responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. 1.141. If claims are added after the selection, applicant must indicate which are readable upon the elected species.

M.P.E.P. 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103 of the other invention.

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filled petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(h).
